Mariana Senciani

Building digital products with strategy, design & AI | Product Owner • Product Designer | B2B • SaaS | AI-Driven Discovery, Strategy & Design

Brazil

Summary

I'm currently working as Product Owner and Builder at Smartleader, a B2B SaaS platform for performance and HR management. I work across multiple modules, sections, user roles, and business needs, contributing from problem discovery through deployment in a context that requires balancing business rules, user experience, prioritization, and technical feasibility. I use tools such as Claude, Claude Code, and Cursor to support discovery, information organization, documentation, and solution prototyping. My Product Design experience also helps me structure projects with a focus on information architecture, usability, interaction, interfaces, and product consistency. I also work daily with code version control and front-end development. Before moving into a role more focused on Product Ownership, I built my career across Product Design, systems, and digital projects. At Sicredi, I contributed to a digital initiative that attracted over 250,000 visits, with more than 95% of traffic coming from mobile devices. At LWSA, I designed the application and candidate-tracking experience for the Quero Ser Dev program, working alongside the development team to implement the solution. One edition of the program, aimed at professionals over 40, received 1,754 applications, demonstrating the initiatives scale. At LIVO, I worked on optimizing the e-commerce purchase experience in a project that reduced the purchase abandonment rate from 42% to 20%.I'm open to new connections and conversations about opportunities that bring product, design, and technology together!

Experience

Smartleader - Sistema Gestão de Performance

10 months

Product Owner & Builder

October 2026 - Present (2 months)

Smartleader is a B2B SaaS platform for performance and people management. The product brings together different HR and leadership journeys, with modules and user roles that require distinct business rules, permissions, and experiences.

• Lead product initiatives from discovery to delivery, including problem exploration, customer and stakeholder interviews, context and metrics analysis, prioritization, scope definition, and collaboration with the development team.

• Manage projects and requests across multiple areas of a complex platform with several modules and user roles, balancing business needs, user experience, dependencies, and technical feasibility.

• Structure product requirements and documentation, including strategic and operational PRDs, user stories, flows, Definition of Done, acceptance criteria, and test scenarios written in Gherkin.

• Work as a Product Builder to explore and build solutions, primarily using Claude, Claude Code, and Cursor to analyze discovery inputs, support interviews, structure documentation, and accelerate functional prototyping.

• Own the evolution of the mobile experience in close collaboration with Engineering, monitoring implementation, clarifying requirements, validating solutions, and adjusting decisions based on technical constraints and learnings.

• Apply my Product Design background to product decisions involving information architecture, usability, interaction, interface design, consistency, and Design System evolution.

Product Designer
February 2026 - October 2026 (9 months)
Barueri, São Paulo, Brazil

• Participate in customer interviews and map systems, user journeys, and flows to understand needs and help define new features and improvements.

• Develop Product Design solutions from initial exploration to implementation-ready specifications, considering business rules, user experience, and different access roles.

• Create, maintain, and evolve Design System components and patterns, including documentation and specifications to increase consistency and scalability.

• Plan and conduct user testing, analyze feedback, and collaborate continuously with Product and Engineering during validation and implementation.

• Expand technical proficiency in GitHub, version control, HTML, and front-end fundamentals, bringing design closer to implementation and improving collaboration with Engineering.

• Help evolve the team’s prototyping process, using Figma, Figma Make, Cursor, and Claude to create more interactive experiences and bring design closer to implementation.

Sicredi

Product Designer and Web Director

December 2024 - February 2026 (1 year 3 months)

Sicredi is a Brazilian cooperative financial institution with over 120 years of history. Its business model is built on cooperative principles, allowing members to participate in the institution’s decisions and results. Sicredi offers a wide range of financial products and services, including accounts, cards, loans, financing, investments, and insurance. With a presence throughout Brazil, it is known for its personalized service, people-centered approach, and commitment to the economic and social development of the communities it serves.

• Develop websites and landing pages using a mobile-first approach, considering information architecture, usability, performance, and business goals.

• Research and analyze user behavior through interviews, personas, heatmaps, Microsoft Clarity, and usability reports to inform experience decisions.

• Participate in discovery and the definition of digital strategies for different clients, working with strategy, content, media, and technology teams.

• Contribute to a Sicredi Centro-Norte project involving local audience research, channel definition, and the development of digital experiences that generated over 250,000 visits, with more than 95% of traffic coming from mobile devices.

• Participate in client alignment meetings and advocate for proposals, concepts, and digital solutions that connect business needs, user behavior, and execution.

• Also work on art direction, motion design, campaigns, and digital asset production, using generative AI tools to optimize creative processes.

LWSA
Graphic and Web Designer | Internal Communications
January 2023 - December 2024 (2 years)
São Paulo, Brazil

LWSA is a Brazilian technology ecosystem that brings together brands and digital business solutions, including Locaweb, Bling, Vindi, and Kinghost, among others. I worked on corporate and digital projects alongside different departments, covering HR initiatives, internal systems, communications, and brand positioning.

• Contribute to digital projects focused on employee experience and HR initiatives, connecting communications, UX, internal needs, and cross-functional execution.

• Design the digital experience for the Quero Ser Dev program, including the application flow and applicant-tracking area, collaborating directly with developers to implement the solution.

• Work on multi-stakeholder projects, supporting needs gathering, information organization, alignment, and the rollout of solutions across different touchpoints.

• Create the brand evolution project from Locaweb Company to LWSA, involving research, cross-department alignment, and the development of an identity representing the ecosystem’s expansion.

• Also contribute creative direction and graphic design for campaigns, events, presentations, corporate materials, and internal communications, as well as mentoring and supporting the creative assistant.

LIVO Eyewear
Art Assistant
September 2022 - January 2023 (5 months)

An eyewear brand with physical and digital operations and an integrated shopping experience across product, communications, and e-commerce.
In addition to marketing activities, I contributed to a significant UX initiative focused on optimizing the purchase flow.

• Analyze e-commerce usability and user experience, identifying friction across browsing, product selection, cart, and checkout.

• Conduct heuristic analysis and participate in user testing to investigate problems with comprehension, consistency, organization, and decision-making throughout the purchase flow.

• Contribute to redesigning the homepage, collections, product pages, and checkout, including the reorganization of categories, labels, information, and interface elements.

• The improvements helped reduce the observed purchase abandonment rate from 42% to 20%.

• Also work on landing pages, paid media campaigns, marketing assets, and visual adaptations across channels.

VEX
Art Assistant | Sales & Marketing
August 2021 - September 2022 (1 year 2 months)

A company operating in the Out-of-Home (OOH) and Digital Out-of-Home (DOOH) advertising market, including roadside and digital formats. My work connected Marketing, Sales, and Planning, with involvement in campaigns, data analysis, and media placement decisions.

• Support campaign planning and implementation, coordinating requests across Marketing, Sales, and Strategic Planning and helping organize deliverables.

• Analyze media metrics and performance results to identify opportunities and provide information for commercial and strategic decisions.

• Organize and visualize campaign data to make results easier to interpret, develop recommendations, and communicate with internal audiences.

• Support the definition of media placement strategies and plans based on analyzed data, contributing to decisions about formats, locations, and campaign targeting.

• Develop sales presentations and strategic materials to support proposals, media plans, and client negotiations.

• Create social media content and assets, support Instagram management, and organize the publishing calendar.

Grupo Rabbit
1 year

Squad Lead
August 2020 - December 2020 (5 months)
São Paulo, Brazil

Grupo Rabbit specializes in solutions for the education sector, including consulting, communications, management, and institutional development. It was one of my early career experiences, where I began developing skills in task organization, collaboration, and leadership.

• Lead the creative team, supporting task distribution, delivery tracking, workflow organization, and team development.

• Participate in project planning and management alongside copywriting and other departments, balancing strategic needs, deadlines, and creative execution.

• Monitor team requests and support creative professionals through guidance, feedback, and delivery organization.

• Work on communication and design projects for different clients in the education sector.

Art assistant

January 2020 - July 2020 (7 months)

São Paulo, Brazil

• Plan and manage content in partnership with the copywriting team, ensuring alignment between strategy, messaging, and visual execution.

• Contribute to communication projects for education-sector clients, managing multiple requests and deadlines.

• Develop digital and print materials, including presentations, e-books, corporate assets, uniforms, and adaptations of key visuals.
